This book tells the story of how John Egan gradually overcame the odds and, piece by piece, rebuilt this great company, winning over the workforce, the overseas dealers and, most important of all, the customers. Working with Margaret Thatcher and her Government, Egan and his team of managers overcame every obstacle, every set-back, every challenge. Again and again, it looked impossible. Yet using innovative techniques, intelligence, eloquence, openness, motor racing and much more, they saved this most charismatic company which has created some of the finest and most loved motor cars of all time. It is an amazing story that will appeal equally to car enthusiasts, those in business and readers interested in social history.

A renowned Jaguar expert offers a comprehensive historical review of the highly collectable XJS series of coupes, cabriolets and convertibles with particular emphasis on quality evaluation, maintenance and upgrades. Jaguar XJS takes the reader through the 20-year history of a model series which, after a lukewarm reception in 1975 by Jaguar enthusiasts who expected a replacement for the famed E-Type, matured through many evolutions into some of the most stylish cars ever to wear the Jaguar badge, earning along the way an enviable reputation on the international motor racing scene.

No car has had such a profound impact on the motoring scene as the original Mini. Designed in response to petrol shortages in the late 1950s, it was introduced in 1959 in both Austin and Morris guises, with either basic or De Luxe trim levels. Success came swiftly, and before long its makers at BMC were introducing van, pick-up and estate versions, high-performance Mini Coopers, and higher equipment levels on the Mini Super. Right through the 1960s, the success story continued, and the original formula proved so right that the updated Mk II models of 1967 were instantly recognisable as versions of the original and much-loved car. These early Minis are as much admired and sought-after today as ever, offering their own unique blend of nimble driving pleasure with readily affordable running costs. They are also increasingly the subject of detailed, part-number-perfect restorations, and this book is designed to help all those who aim to restore one of these early British-built Minis to their correct specification. Within these pages, respected classic car historian James Taylor gives each major model of Mini its own section. These sections provide full details of specifications and examine individual areas of each model in depth. They are backed up by colour photography of outstanding examples that illustrate the way these cars looked when they were new. Body panels, external trim and badging, paint colours, interior trim, dashboard, instruments and controls, under-bonnet components, engine and transmission, lights -- all this and more is comprehensively covered for both Mk I and Mk II Minis. For rapid reference to vital information, this formula has proved to be the most useful one for restorers. With more than 300 specially commissioned colour photographs, Factory-Original Mini will delight and enthral the restorer and the more casual Mini enthusiast alike.

The Jaguar XJR-9 is the Group C sports racing car built by Jaguar for the 1988 racing season, winning on its debut at the Daytona 24 Hours, and going on to take victory at the Le Mans 24 Hours (Jaguar's first win at the French classic since 1957). The car also took Jaguar to victory in the 1988 Teams' World Championship, and Drivers' World Championship with Martin Brundle. Works cars ran in the American IMSA Championship (running in Castrol livery), as well as the World Sports Car Championship. The XJR-9 is one of the most evocative sports-racing cars of the 1980s, thanks to its success, instantly recognizable Silk Cut livery, and unforgettable V12 engine note. This Manual tells the complete design and engineering story of the XJR series of sports-racing cars, focusing on the XJR-9, and featuring extensive input from many of the engineers and drivers involved.
