If you have an abnormal cervical cancer screening test result, you may need further testing. The following tests may be done depending on your age and your initial Pap test result (see Table 1): . Repeat Pap test or co-test—A repeat Pap test or a repeat co-test (Pap test and a test for high-risk types of HPV) is recommended as a follow-up to some abnormal test results.

Abnormal Cervical Cancer Screening Test Results | ACOG

This is a consensus document with input from ACOG, ACS, SGO and multiple other professional organizations, including those affiliated with laboratory medicine. (In October 2020, ACOG released a practice advisory supporting the new ASCCP guidance and withdrew its previous practice bulletin on cervical cancer screening management.

The New ASCCP Management Consensus Guidelines for Abnormal ...

The Society of Gynecologic Oncology and ASCCP endorse this document. On August 21, 2018, the U.S. Preventive Services Task Force (USPSTF) published its final recommendation statement 1 on cervical cancer screening in average-risk women Table 1. The major change from the 2012 USPSTF guidelines is that for average-risk women aged 30-65 years, the USPSTF now recommends high-risk human papillomavirus (hrHPV) testing alone every 5 years as an alternative to screening with cervical cytology ...

Cervical Cancer Screening (Update) | ACOG

Guidelines for the Assessment of Abnormal Cervical Cytology Ia: Persistent LSIL/ASCUS Discharge * Positive Predictive Value of ASCUS/LSIL for CIN2+ is 15-25% Persistent LSIL /ASCUS * (Over 12 months) Satisfactory Colposcopy, Pap in 12 months No CIN 2, 3 Manage per guideline CIN 2, 3 No CIN 2, 3 Unsatisfactory Colposcopy (ECC required) CIN 2, 3

Current Pap Test Recommendations. (ASCCP, ACS, ASCP, USPSTF, ACOG) • First Pap test age 21 • Test every three years until age 30 • Age > 30, HPV test with Pap test every 5 years. -If HPV testing unavailable, Pap every 3 years. • No more testing after hysterectomy (if cervix has been removed) or age 65. -With negative Pap history.

Guidelines for Paps, HPV Tests and Managing Abnormal Pap Tests

• Pap Smear Screening begins at age 21 regardless of when sexual activity starts. Adolescents/young women 20 and below are not recommended to have a Pap test or HPV testing. Pap screening may end at age 65 if the Pap history is unremarkable and the patient is low risk. • Screening recommended every 3 years for women 21-29. Women 30-65 and older who have had 3 consecutive negative Pap test and who have no history of CIN2 or 3, etc. OR

Pap Smear Referral Guideline

ASCUS Pap Guidelines is a continuing suggestion due to the concern that it is crucial when relating to Abnormal Pap Smear After Cone Biopsy, Abnormal Pap Smear After Hysterectomy, and Abnormal Pap Smear After LEEP. Somebody could enhance the body's immune system and therefore generally create immunity to an HPV infection in literally just a few months, sooner than it can produce any significant injury.

ASCUS Pap Guidelines

To address these issues, the American College of Obstetricians and Gynecologists (ACOG) has released evidence-based guidelines for management of abnormal cervical cytology and histology. The...

ACOG Releases Guidelines for Management of Abnormal ...

The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation. For women age 21 to 29, only "cytology testing," which looks for abnormal or unhealthy cells under a microscope, should be used.

ThePapApp

In contrast to ASCUS, neither observation nor a repeat Pap smear is an option because the potential for abnormalities is much higher in the AGUS smear. Management is based on the AGUS subclassification (if given) and the patient's age. To continue reading this article ...

Managing ASCUS and AGUS Pap smears | MDedge. ObGyn

Pap results showing ASCUS cells are one of the most common abnormalities seen. If the HPV test results are negative, and a patient has a Pap abnormality showing ASCUS cells, a follow-up Pap test is usually recommended in three years. If the hybrid capture test results are positive, with ASCUS, a colposcopy is recommended.
