### Beginner Guide To Maple Software

Maple is a procedural programming language. It also includes a number of functional programming constructs. If you have written programs in Basic, Pascal, Algol, C, Lisp, or Fortran, you should be able to write numerical programs in Maple very quickly. Maple is not strongly typed like C and Pascal. No declarations are required. Maple is more

### Programming in Maple: The Basics. - TU Wien

About Maple At the heart of Maple is a computer algebra system, that is, a system for doing algebraic manipulations symbolically (and therefore exactly). However, Maple also incorporates numerics, graphics, and text processing. It is also a programming environment.

### Maple Tutorial - Michigan Technological University

A software developer can turn an idea into something tangible. That being said, what you should do is focus on understanding programming fundamentals. Even if you just want to get involved with a software's design features, it's vital that you have a working knowledge of coding and can create basic prototypes.
