Mechanics: For BPUT has been mapped to the syllabus of the mechanics paper common to all the branches of engineering in the first year at Biju Patnaik University of Technology, Orissa. Difficult-to-understand concepts have been explained with the help of lucid, self-explanatory diagrams. Several solved problems have been included at relevant places. Chapter summaries, review questions and unsolved problems facilitate learning.

If you have mastered the fundamentals of the PL/SQL language and are now looking for an in-depth, practical guide to solving real problems with PL/SQL stored procedures, then this is the book for you.

Six Characters in Search of an Author (1921) is a metatheatrical drama by Luigi Pirandello. Viewed as an important work of absurdist literature, the play was a critical failure when it was first staged in Rome. Revised by its author and bolstered by successful performances in New York City, Six Characters in Search of an Author has been recognized as a pioneering examination of the nature of creativity, the relationship of the director and actors to the work of art, and the psychological stress associated with staging a theatrical production. While preparing to rehearse a new play by director Luigi Pirandello, a theatre company is interrupted with the arrival of six strangers on set. After a moment of frustration and confusion, the director is told that they are six unfinished characters whose story cannot be told without his intervention. The Father, Mother, Son, Stepdaughter, Boy, and Child refuse to leave, forcing the director to convince his actors to help them fulfill their wish. As the story begins to take shape, the characters exert more and more control over the set and the participation of the other actors, soon overtaking the director entirely. Strange and compelling, Six Characters in Search of an Author is a unique play which saw resistance from critics and theatergoers for one reason only: its methods forced them to question the nature of reality itself. With a beautifully designed cover and professionally typeset manuscript, this edition of Luigi Pirandello's Six Characters in Search of an Author is a classic work of Italian literature reimagined for modern readers.

Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that "the principals of ecology apply to all living things." These principles tell us that, within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

Communicative English for Engineers and Professionals covers the syllabi of B. Tech, BE, B.Com, M.Com, BBA, MBA, hospitality, B. Pharma, nursing, physiotherapy, and other courses. It integrates learning modules for spoken and written skills in English to give the readers an edge in their careers. Focusing on the requirements of professionals and students, this book equips them to effectively communicate and present themselves at their workplace and other interactive spheres.

This book presents high-quality papers from the Third International Conference on Smart Computing and Informatics (SCI 2018–19), organized by the School of Computer Engineering and School of Computer Application, Kalinga Institute of Industrial Technology Deemed to be University, Bhubaneswar, from 21 to 22 December 2018. It includes advanced and multi-disciplinary research on the design of smart computing and informatics, focusing on innovation paradigms in system knowledge, intelligence and sustainability that have the potential to provide realistic solutions to various problems in society, the environment and industry. The papers featured provide a valuable contribution to the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in varied disciplines of science, technology and health care.

Vols. for 1982- include Israel, Morocco, Turkey, Cyprus, Tunisia and the USSR.
