An illustration of several key components in a typical four-stroke engine. For a four-stroke engine, key parts of the engine include the crankshaft (purple), connecting rod (orange), one or more camshafts (red and blue), and valves. For a two-stroke engine, there may simply be an exhaust outlet and fuel inlet instead of a valve system.

Component parts of internal combustion engines - Wikipedia

1. Engine Block. Image source. Engine block is an important parts of an engine. It is made by pouring the molten iron or aluminum alloy into a mold. The mold is made such that we should have required number of holes in the casted block, which are said to be the number of cylinders of an engine or engine cylinders.

What are the Main Parts of an Automobile Engine ...

A piston is a cylindrical component, which fits inside the cylinder and forms a movable boundary. Piston moves smoothly inside cylinder, with the help of proper lubrication. A piston makes almost airtight contact with the cylinder walls, with the help of piston rings. Piston is the first link in transmitting the gas force into crankshaft.
