Guidelines are lines that can be placed
anywhere in the drawing window to aid in
object placement. In some applications,
guidelines are known as guides. There are
three types of guidelines: horizontal,

In Draw it is possible to use the Center to Page (P) command also on guidelines, but unfortunately it doesn't work in PhotoPaint. Easiest way I can think of is to type the page width in the Position box in Property Bar (X box for vertical, Y box for horizontal guidelines) and divide by 2.

Double click shows the guidelines docker if it is not currently displayed. But if the guidelines docker is already displayed but hidden by another docker, it does not bring it to the front. I think this is wrong.

Double clicking on a guideline should always result in the guidelines docker being

I use a lot of guidelines, but once a drawing is complete, I like to remove all the guidelines rather than just hide them. In X6, I used to be able to open the guidelines manager and select ALL then hit delete. Now in X7 this no longer works and I need to individually select and delete them. Is there a work around for this?
