Emerging Market Bank Lending and Credit Risk Control covers the theoretical and practical foundations of contemporary credit risk with implications for bank management. Drawing a direct connection between risk and its effects on credit analysis and decisions, the book discusses how credit risk should be correctly anticipated and its impact mitigated within framework of sound credit culture and process in line with the Basel Accords. This is the only practical book that specifically guides bankers through the analysis and management of the peculiar credit risks of counterparties in emerging economies. Each chapter features a one-page overview that introduces its subject and its outcomes. Chapters include summaries, review questions, references, and endnotes.

and cyclical risks, including unequal development, policy uncertainty, declining oil prices and localised unrest, the longer-term growth fundamentals are clear. Following the presidential elections in March 2015, the newly elected government of President Muhammadu Buhari will face a host of challenges, ranging from high levels of rural poverty to concerns over governance and an insurgency in the north. The outcome of the presidential elections gave Nigeria its first peaceful handover of power in more than 16 years, as well as a boost of momentum that, along with its economic fundamentals, places it on the cusp of potentially long-term, broad-based growth.

This volume addresses the importance of the efficient operation of financial

intermediaries with respect to the efficient functioning of the present and future financial systems.

Pan-African banks are expanding rapidly across the continent, creating cross-border networks, and having a systemic presence in the banking sectors of many Sub-Saharan African countries. These banking groups are fostering financial development and economic integration, stimulating competition and efficiency, introducing product innovation and modern management and information systems, and bringing higher skills and expertise to host countries. At the same time, the rise of pan-African banks presents new challenges for regulators and supervisors. As networks expand, new channels for transmission of macro-financial risks

and spillovers across home and host countries may emerge. To ensure that the gains from cross border banking are sustained and avoid raising financial stability risks, enhanced cross-border cooperation on regulatory and supervisory oversight is needed, in particular to support effective supervision on a consolidated basis. This paper takes stock of the development of pan-African banking groups; identifies regulatory, supervisory and resolution gaps; and suggests how the IMF can help the authorities address the related challenges.

This first of three volumes on credit risk management, providing a thorough introduction to financial risk management and modelling.

Credit Risk Management will enable general bankers, staff, and credit analyst trainees to understand the basic information and principles underlying credit risk evaluation, and to use those underlying principles to undertake an analysis of non financial and financial risks when preparing a credit proposal. Since the best loans are the ones that do not present problems during the repayment phase, the authors also focus on elements relating to the proactive management of those loans during their inception. This book introduces: *Credit analysis, approval and management processes
