Most of us have been perplexed by a strange sense of familiarity when doing something for the first time. We feel that we have been here before, or done this before, but know for sure that this is impossible. In fact, according to numerous surveys, about two-thirds of us have experienced déjà vu at least once, and most of us have had multiple experiences. There are a number of credible scientific interpretations of déjà vu, and this book summarizes the broad range of published work from philosophy, religion, neurology, sociology, memory, perception, psychopathology, and psychopharmacology. This book also includes discussion of cognitive functioning in retrieval and familiarity, neuronal transmission, and double perception during the déjà vu experience.

"The second edition covers the latest scientific discoveries that shed light on the mysterious phenomenon, considering the latest neurophysiological investigations and research on possible reasons why déjà vu is often associated with a sense of predicting the future or knowing what happens next. By placing the scientific study of déjà vu within its historical context and covering a broad range of perspectives on the subject, this title will be invaluable to upper level undergraduates, postgraduates and researchers of Cognitive Psychology, specifically those focusing on Memory Phenomena"--

With Bilan, it's always been money first. Everything else follows behind, even Aamina. For now, they are on completely different pages, which doesn't quite work in this love story. One night changes everything when Mina almost loses her life. When she meets Joraad, a vicious street goon who would die protecting the people he loves, Mina is drawn to him like a magnet. If only she could take his caring qualities and install them into her long-term boyfriend, then she would have the perfect man. To Mina, that would be all roses, but every rose has its thrones.

Dedicated and popular oceanographer, Danielle Carter returns from an overseas Global Warming Summit, enriched with ideas to continue her research. However, her return to the Great Barrier Reef is anything but glorious her family and well organized life had been shattered during her absence. With echoes from the past haunting Danielle, she begins a quest to find the truth and heads for the Bahamas and another Marine Research Centre. When she arrives there, not everything works out as she has planned, though determined to get her answers, she stays on the island, at least for a few more days. Her perseverance pays off ; she finds missing clues relating to her family. And then she meets a man she had seen but not spoken to at another location. He had intrigued her then, though knew that shed never see him again. Now, circumstances were different he was real and the first man in her life she wanted to get close to, even love or marry. But the answer to that is in the lap of fate.

This book consists of contributions originating from a conference in Obedo, Portugal, which honoured the 70th birthday of V.A. Solonnikov. A broad variety of topics centering on nonlinear problems is presented, particularly Navier-Stokes equations, viscosity problems, diffusion-absorption equations, free boundaries, and Euler equations.

They each sense a powerful connection at their first meeting, but no one could have ever imagined the incredible scenario about to unfold, forever altering the lives of all involved. . . . DEANNA A new business venture takes priority over romance, yet she longs to meet her Mr. Right. At the same time, shes being haunted by a recurring nightmare, relentless in its tormenting attacks until desperation leads her to a dark and dangerous world. JOSH At the pinnacle of a demanding career, with everything he worked for finally coming together, he begins to yearn for the serious relationship his cherished grandmother, ANNA, insists he needs. Neither could have ever suspected that a vintage keepsake would clear the path to true love. FAITH Deannas closest friend, her greatest ally through the best and worst of times, she believes she could supply an antidote for the horrifying dreams that are threatening her friends well-being. If only Deanna would let her. RIVKA and DAVID Fortified by young love, emboldened by circumstances, they stand strong against a ruthless enemy in a grueling fight for their lives.

Kim is a southern, country girl from Georgia. Like any other woman, she desires deeply to be loved. After many attempts to find that special someone and failing, she decides to redirect her focus on herself and her only daughter, whom she cares dearly for. Working becomes her way to make up for her loneliness, until just as she had almost given up on love..., her attention and heart were stolen by Jason. Jason was a well-groomed, slim, southern man. He was intelligent, kind, honest, respectful, vigorous, humorous and adventurous. Kim's sorrows immediately fade away, her life fills with happiness and uncontrollable laughter. Everyone around her notices the change in her disposition, the elation exuded from her. Judging things by her past relationships, she realizes that things usually begin lovely, but end tragically. She questions her fate; how will this relationship end? Or will it last? Only time will reveal that unknown secret.

The first two editions of the Dictionary of Neurological Signs were very well-received by readers and reviewers alike. Like those editions, this Third Edition, updated and expanded, can be almost as well described in terms of what the book is not, along with details about what it is. The Dictionary is not a handbook for treatment of neurological disorders. While many entries provide the latest treatment options, up-to-the-minute therapies are not discussed in bedside level detail. The Dictionary is not a board review book because it is not in Q&A format but could easily serve in that capacity since each entry is a fairly complete snapshot of a specific disorder or disease. The Dictionary is an alphabetical listing of commonly presenting neurological signs designed to guide the physician toward the correct clinical diagnosis. The Dictionary is focused, problem-based, concise and practical. The structured entries in this practical, clinical resource provide a thumbnail of a wide range of neurological signs. Each entry includes: □ A definition of the sign □ A brief account of the clinical technique required to elicit the sign □ A description of the other signs which may accompany the index sign □ An explanation of pathyophysiological and/or pharmacological background □ Differential diagnosis □ Brief treatment details Where known, these entries also include the neuroanatomical basis of the sign. The Dictionary of Neurological Signs, Third Edition, is an indispensable reference for all students, trainees, and clinicians who care for patients with neurological disorders.

When Savannah Watkins confronts her unfaithful lover, ending yet another relationship, she knows it's time to finally learn her lesson and start leaving her heart out of the equation. Instead of pouring time and energy into undeserving men, Savannah decides to focus on herself-and to fulfill her dream of finally getting a college degree. It's the perfect plan-until Savannah finds herself sitting in a class taught by David, the man Savannah considers her "first mistake." Tensions build as Savannah and David clash, both in the classroom and out of it. As they attempt to decipher their complex feelings and map a way forward in light of their history, the two confront hidden desires and motives. With a clear plan of making Savannah his, David convinces her to go back to the island of St. Maarten-the place they are from. Revelations from Savannah's past threaten to cloud her ability to see things clearly. Afraid of her feelings, Savannah bolts, leaving David to pick up the pieces of his heart and his life. But with such a strong connection between them, will she really stay away forever? Or will the past call her back to embrace her future?
