With a Consolidation style, the master data is generally consolidated from multiple sources in the hub to create a single version of truth, otherwise known as the golden record. A golden record is stored in the central hub and used for reporting and reference. However, any updates made to the master data are then applied to the original sources.

~~4 Common Master Data Management Implementation Styles~~

The Merge operation is performed on any Power Query query with a tabular shape, independent of the data source that the data comes from. For more information about combining data sources, see Combine multiple queries. In this task, you combine the Products and Total Sales queries by using a Merge and Expand query step.
