In the Italian system the pass mark for examinations is 18 out of 30. The highest mark for examinations is 30 out of 30 (30 cum laude is also possible). An excellent performance is usually graded ...

This book constitutes the refereed proceedings of the 4th International Symposium on Ubiquitous Computing Systems, UCS 2007, held in Tokyo, Japan, in November 2007. The 16 revised full papers and eight revised short papers presented were carefully reviewed and selected from 96 submissions. The papers are organized in topical sections on security and privacy, context awareness, sensing systems and sensor network, middleware, modeling and social aspects, smart devices, and network.

A look at the German High Command during World War II challenges the myth that the German Generals could have won the war had Hitler not interfered, and maps out the history and

the personalities of the German Command Structure.

Explains how machine language works, subroutines, address modes, and temporary storage, and shows how to link machine language and BASIC

Exposition of fourth dimension, concepts of relativity as Flatland characters continue adventures. Topics include curved space time as a higher dimension, special relativity, and shape of space-time. Includes 141 illustrations.

Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

Glen of Loch Trool. Spring 1808. Davina McKie is a bonny lass of seventeen, as clever as they come and a gifted musician. Unable to speak since childhood, she is doted on by her belligerent younger brothers, Will and Sandy, who vow to protect their silent sister. When the lads are forced to depart the glen, Jamie McKie intends to brighten his daughter's summer by escorting Davina to the Isle of Arran. Her cousins make her welcome at the manse, and the parish delights in hearing their talented fiddler. But when she catches the eye of a handsome young Highlander on Midsummer Eve, sheltered Davina is unprepared for the shocking events that follow. A timeless story of passion and revenge, of lost innocence and shattered dreams, Grace in Thine Eyes explores the sorrow of unspeakable shame and the gift of immeasurable grace. A Reader's Guide and Scottish Glossary Are Included

Best-selling authors Shaunti Feldhahn (For Women Only) and Robert Lewis help women understand how to live boldly and biblically while staying in step with the twenty-first century.

This exceptional memoir by one of Britain's most distinguished living soldiers describes a life lived against the backdrop of the most significant military events of the last century. David Fraser was raised in a military family deep in the shadow of the First World War. He absconded from school to enlist at the earliest possible moment after the Second was declared. He was intimately involved afterwards in crises in Suez, Cyprus and Malaya, and eventually became Vice Chief of the General Staff. Wars and Shadows is one of the last notable memoirs of the great conflict in the middle of the last century. It evokes the lives and characters of many of those who fought - and, often, lost their lives - vividly and tenderly. Like the very best memoirs, as well as entertaining us, it also allows us to reflect on how we might have reacted in similar circumstances to those the author faced, and whether eventually we might be able to give an account even half so satisfying as this of our own lives and times.

"I'd rather have one or two of his whiplashing essays in my hands than almost any tome of philosophy". -- Thomas Moore
