KEY BENEFIT: With its real-life examples and cases, and its lively, conversational writing style, Bovee/Thill/Mescon brings concepts to life and prepares students for obtaining and pursuing satisfying business careers. **KEY TOPICS:** Bovee/Thill/Mescon weaves a four-part pedagogical tool through out each chapter. It starts with Orient, which outlines what is going to be covered in the chapter and then connects these topics with a "role-model" business professional. Next is Explore, which looks at the skills that their "role-model" used in order to be successful. Third is Confirm, which revisits what they have learned in the chapter. And, finally, Apply allows students to use

the skills they have learned in the chapter. MARKET: For introductory level business students.

Covering business communication skills, this text includes a grammar check, writing improvement exercises and cases which break down the writing process into simple components. E-mail, Web research, team and critical thinking exercises have also been added to this edition.

as life increasingly takes place online, businesses recognize the opportunity for a competitive advantage. Today's networking professionals have become central to nearly every aspect of business, and this book provides the essential foundation needed to build and manage the scalable, mobile, secure networks these businesses require. Although the technologies evolve rapidly, the underlying concepts are more constant. This book combines the foundational concepts with practical exercises to provide a well-grounded approach to networking in business today. Key management and technical issues are highlighted and discussed in the context of real-world applications, and hands-on exercises reinforce critical concepts while providing insight into day-to-day

operations. Detailed technical descriptions reveal the tradeoffs not presented in product summaries, building the analytical capacity needed to understand, evaluate, and compare current and future technologies.
