IEEE Std 32-1972 (Reaff 1990); IEEE Standard Requirements, Terminology, and Test Procedures for Neutral Grounding Devices. This standard applies to devices (other than surge arresters) used for the purpose of controlling the ground current or the potentials to ground of alternating current systems. It defines usual and unusual service conditions, and gives bases for rating such devices.

## IEEE - IEEE Press

The IEEE Standard for Floating-Point Arithmetic (IEEE 754) is a technical standard for floating-point arithmetic established in 1985 by the Institute of Electrical and Electronics Engineers (IEEE). The standard addressed many problems found in the diverse floating-point implementations that made them difficult to use reliably and portably. Many hardware floating-point units use the IEEE 754 ...
