This volume of the series "Translation and Multilingual Natural Language Processing" includes most of the papers presented at the Workshop "Language Technology for a Multilingual Europe", held at the University of Hamburg on September 27, 2011 in the framework of the conference GSCL 2011 with the topic "Multilingual Resources and Multilingual Applications", along with several additional contributions. In addition to an overview article on Machine Translation and two contributions on the European initiatives META-NET and Multilingual Web, the volume includes six full research articles. Our intention with this workshop was to bring together various groups concerned with the umbrella topics of multilingualism and language technology, especially multilingual technologies. This encompassed, on the one hand, representatives from research and development in the field of language technologies, and, on the other hand, users from diverse areas such as, among others, industry, administration and funding agencies. The Workshop "Language Technology for a Multilingual Europe" was co-organised by the two GSCL working groups "Text Technology" and "Machine Translation" (<http://gscl.info>) as well as by META-NET (<http://www.meta-net.eu>).

Davie Jones-an ugly duckling growing up in small-town Mississippi with a mother who couldn't get any meaner-is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life-Sixteen Candles. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood-as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams-and break her heart again. With wholly original characters and a cinematic storyline, 32 Candles introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

Contrastive Linguistics (CL), Translation Studies (TS) and Machine Translation (MT) have common grounds: They all work at the crossroad where two or more languages meet. Despite their inherent relatedness, methodological exchange between the three disciplines is rare. This special issue touches upon areas where the three fields converge. It results directly from a workshop at the 2011 German Association for Language Technology and Computational Linguistics (GSCL) conference in Hamburg where researchers from the three fields presented and discussed their interdisciplinary work. While the studies contained in this volume draw from a wide variety of objectives and methods, and various areas of overlaps between CL, TS and MT are addressed, the volume is by no means exhaustive with regard to this topic. Further cross-fertilisation is not only desirable, but almost mandatory in order to tackle future tasks and endeavours.)

A Python community leader teaches professionals how to integrate web applications with Python.

"The Gray Nun" by Nataly von Eschstruth (translated by Lionel Strachey). Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre.
