India Development Report 2012-13, the seventh report in the IDR series, assesses the post-reform performance and suggests policies that are needed in the next decade and beyond to achieve the various economic, social, and environmental goals of the nation.

Indian economy with more than 2 trillion dollars of GDP in 2017 is different from that in 1991. The country is more globally integrated now as compared to the year when reforms started. The global financial crisis that originated in the US in 2008 transmitted to emerging market economies like India. Again continued global slowdown in the last few years had an adverse impact on India's economy as the value of exports declined significantly in the last two years. Currently, India's macroeconomic parameters such as current account deficit, inflation, fiscal deficit and exchange rate are under control and stable. India is attracting large inflows of foreign direct investment. India Development Report 2017 evaluates the Indian economy since the reforms of 1991 in terms of macroeconomic growth, agricultural developments, social sector achievements, and growth in trade and industry. Presenting a comprehensive analysis of reforms that took place in these domains during the last twenty five years, this report also addresses recent changes and issues that have affected the country's economy, like changes in national account statistics due to introduction of new series, manufacturing and services in the context of 'Make in India'

initiative, changes in the insolvency and bankruptcy laws, and achievements in education and health sectors, among others. The report includes a data-rich statistical appendix which provides an independent assessment of the economic and social indicators discussed in the report.

The macroeconomic policy response in India after the North Atlantic financial crisis (NAFC) was rapid. The overshooting of the stimulus and its gradual withdrawal sowed seeds for inflationary and BoP pressures and growth slowdown, then exacerbated by domestic policy bottlenecks and volatility in international financial markets during mid-2013. Appropriate domestic oil prices and fiscal consolidation will contribute to the recovery of private sector investment. Fiscal consolidation would also facilitate a reduction in inflation, which would moderate gold imports and favorably impact real exchange rate and current account deficit.

According to recent estimates, India is the third largest economy in the world after USA and China in terms of purchasing power parity. More significantly, the country witnessed a major shift in political leadership when a clear mandate was provided to the BJP-led NDA coalition in the national elections in May 2014. This has empowered the new government to take bold economic decisions to meet the short- and longer-term challenges of this country.

Accelerating growth is the immediate challenge for the new government as it is expected to deliver on the economic front as well as on the social front. It has to bolster businesses as well as the common people. India, aspiring to be a global power, must promote harmonious and inclusive socio-economic development. Keeping this in mind, many crucial questions are raised: How has the economy been performing? What should be done to revive GDP growth?

What is the relationship between investment and growth? How to address India's vulnerability to external crises? How to control inflation? How to achieve social and environmental goals? Providing answers to these and other such questions, this volume, the eighth in India Development Report series, examines: -Macroeconomic developments and economic growth, inflation, and external shocks -Investment and growth nexus -Dynamics of a firm's competitive behavior -Small enterprises and the corporate debt market -Oil and gas price reforms and agriculture, changing face of rural areas, food inflation, and food security -Health and health care, and health insurance -Corporate social responsibility, climate change, urban sustainability, transport, and sustainable development. The Report includes a statistical appendix, which is a treasure trove of various economic and social indicators and helps provide an independent assessment of the Indian economy.

India's economic resurgence has been the subject of many extravagant predictions and hopes. In this powerful and wide-ranging book, distinguished economist Vijay Joshi lays out a penetrating analysis of the shaky foundations of the country's performance, and charts the course that it should follow to achieve widely-shared prosperity. Joshi argues that for India to realize its huge potential, the relation between the state, the market, and the private sector must be comprehensively realigned. Deeper liberalization and more extensive privatisation will be necessary. But they will not suffice to achieve India's economic objectives. The state needs to perform much more effectively many core tasks that belong squarely in its domain. India needs more of the market as well as more of the state. The road India takes will matter not only for the lives of its billion-plus people but also for the course of global economics and politics. In the course of his enquiry,

Joshi examines in depth all the critical areas of Indian development policy, including employment and the 'demographic bulge'; investment and productivity; the markets for goods, resources, and finance; macroeconomic stability; public sector banks and enterprises; the infrastructure deficit; social protection and safety nets; education and health care; environmental sustainability; international economic relations; state capacity and accountability; and corruption and crony capitalism. His design for radical reform incorporates a fiscally affordable scheme to provide a regular 'basic income' for all citizens that would speedily abolish extreme poverty. An authoritative work of tremendous scope and depth, India's Long Road will be an essential resource for anyone who wants to know where India is today, where it is headed, and what it should do to attain its ambitions.

The book traces the remarkable transformation of India from a slow growing economy to one of the fastest growing in the world. Discussing events that led to a crisis situation and the consequent initiation of reforms, it describes how growth was sustained in a low-income economy with large diversities.

This concise and reader-friendly volume provides a comprehensive and updated account of the trends and issues across various sectors of the Indian economy. A statistical appendix gives a snapshot of key indicators.

The India Policy Forum (IPF) is India's most prominent annual economic policy conference in the summer season of New Delhi and is organized by NCAER, the National Council of Applied Economic Research. The primary goal of the IPF is to promote original policy and empirical research on India, including policy-focused review articles that seek to define the best economic policy advice based on robust, empirical

research. The annual IPF conference provides a unique combination of intense scholarship and expert commentary on commissioned research papers with a strong focus on policy. The revised papers and conference proceedings are published in this volume, including the comments of paper discussants and a summary of the floor discussion on each paper.

This volume argues that while labour market reforms may be necessary in some specific cases, by no means are labour market policies the main explanation for the widespread increase in unemployment and underemployment across Asia and country specific studies undermine the case for across-the-board labour market reforms.

The volume emphasizes the need for economic reforms with equitable development. It focuses on key inter-related elements of inclusive growth: agriculture, poverty, food security and employment, social sector, and regional disparities; examining the performance, issues and challenges. Arguing for pro-poor and people-centric policies, it suggests that growth and equity objectives should be pursued simultaneously. It also stresses the importance of women's economic and social empowerment and upliftment of socially disadvantaged sections for realizing the objective of inclusive growth.
