Select a dinosaur and measure it while it is dry. The best way to do it is to measure from tail to nose. Help kids make a mark on their measuring strips. After measuring the dry dinosaurs, place each dinosaur in a clear cup filled with water. Ask the kids what they think will happen? Kids can record their data and/or predictions in blank books.

~~How to Measure Growing Dinosaurs with Your Kids - Early ...~~

Growing a dinosaur egg is a fun activity to do with your kids or class. Even though they are not real, kids can have fun pretending that they are. Fill the container with water. The water should be less than 35 degrees Celsius. Place the dinosaur egg in the container, making sure it is submerged completely. Wait 24 to 48 hours for the shell to ...

Give the plant a heavy feeding when you first plant it to give it a good start. It takes a lot of energy to create this much growth, and this makes Gunnera a heavy feeder. In addition to the fertilizer you dig in with the first planting, feed them twice more during the season with a good, all purpose fertilizer.

Plant 'Lacinato' and you'll be growing part of agricultural history - this variety dates back to at least the 1700s and was grown in Thomas Jefferson's garden at Monticello. 'Lacinato' Plants grow to two or three feet tall and have leaves that can reach two feet long.

~~How to Grow Lacinato (Dinosaur) Kale | Gardener's Path~~

Divide a dinosaur plant at any time during the year. Cut at least 2 inches from the tip of a growing shoot with a clean, sharp knife. Place the open end of the dinosaur plant cutting into the soil so that half of the cutting's length is below the soil. Firm the soil around the cutting to hold it in place.

screeches, eats, burps, sleeps, and poops. He doesn't even know he's a dinosaur! That's where you come in. You can teach the baby just about everything--from peek-a-boo to roaring to table manners to bedtime. Growing a dinosaur is a big job, but you're perfect for it. Why? Because one thing your baby brother wants more than anything . . . is to be just like you. With silly kid-humor and sincere, moving moments, this new-sibling book is a perfect combination of funny, reassuring, and truly useful. It captures the excitement and joy of getting to guide a little brother or sister through life, and uses big laughs, great surprises, and gentle lessons to empower kids in how to be a great sibling and role-model to littler ones. Great for family reading and reading aloud.

Albie is a normal little boy who has extraordinary adventures. When he helps his mum in the garden by planting some seeds, he can't quite believe his eyes the next morning. The garden has grown beyond all belief and these are not just any old plants - oh, no - Albie's seeds have grown into great big jurassic jungle! He rushes outside to discover what else has grown - a fantastic mix of real live DINOSAURS! A colourful, funny follow-up to Supermarket Zoo.

Explores the history of dinosaurs and the discoveries that have been made about them, including how dinosaurs lived, why they went extinct, and what fossil evidence explains about them.

A five-year-old boy searches high and low for his missing dinosaur, and the people he asks for help do not believe such a creature actually exists.

Join the Dino family as they welcome their ROARING new arrival - Dino Baby!

This book provides pictures and brief facts about a variety of different kinds of dinosaurs.

In the last two decades the study of dinosaur eggs and babies has proved a very profitable area of dinosaur research. This book is solely devoted to this topic and reviews our present state of knowledge in this area of paleontology.

Uses a comic book format and informational essays to introduce the meat-eating scipionyx and detail life on Earth during the Cretaceous period.

A world-renowned paleontologist reveals groundbreaking science that trumps science fiction: how to grow a living dinosaur. Over a decade after Jurassic Park, Jack Horner and his colleagues in molecular biology labs are in the process of building the technology to create a real dinosaur. Based on new research in evolutionary developmental biology on how a few select cells grow to create arms, legs, eyes, and brains that function together, Jack Horner takes the science a step further in a plan to "reverse evolution" and reveals the awesome, even frightening, power being acquired to recreate the prehistoric past. The key is the dinosaur's genetic code that lives on in modern birds- even chickens. From cutting-edge biology labs to field digs underneath the Montana sun, How to Build a Dinosaur explains and enlightens an awesome new science.

What could be more fun than a houseful of prehistoric pals? When a boy discovers that dinosaurs are emerging from the eggs sitting on the kitchen counter, it's a dream come true. Unfortunately, the boy is not so sure Mom and Dad will feel the same way, so he decides to hide his new friends. That plan works for a while, but the dinosaurs keep growing, and growing, and growing! New readers will delight in this rib-tickling fantasy with its exuberant illustrations and hilarious twist. An I Like to Read® book. Guided Reading Level E.
