## Difference

What is the difference between orthographic drawing and ...

Typically, an orthographic projection drawing consists of three different views: a front view, a top view and a side view. Other names for these views are plan,

# Download Free Isometric

elevation and section.

Occasionally, more views are used for clarity. The side view is usually the right side, but if the left side is used, it is noted in the drawing.

Orthographic projection can be subdivided into three categories: isometric, diametric and trimetric projection. An orthographic drawing is a clear, detailed way to ...

## Orthographic

What is the difference  
between Orthographic  
and Isometric ...

The isometric view is on  
the left and the  
orthographic view is the  
2D planes broken down  
into separate pieces, on  
the right and below. As  
you can see with the  
image above, there ' s  
quite a difference  
between an isometric

# Download Free Isometric

view and an orthographic view, but you can create one from the other!

## Difference

What Is An  
Orthographic Drawing  
(With Examples) - Don  
Corgi  
(In making an  
orthographic projection,  
any point in the object is  
mapped onto the  
drawing by dropping a  
perpendicular from that

# Download Free Isometric

point to the plane of the drawing.) An isometric projection results if the plane is oriented so that it makes equal angles (hence “ isometric, ” or “ equal measure ” ) with the three principal planes of the object.

## Isometric Orthographic Projection Difference

When  $a$  and  $b$  are equal,  
the projection is

orthographic; otherwise  
the projection is oblique.

Another way to look at it  
is that in an orthographic  
projection, the projector  
lines intersect the plane  
being projected on to at a  
perpendicular angle

(thus, they are  
orthogonal), thus the

# Download Free Isometric

(name of the projection),  
whereas in an oblique  
projection those lines  
form oblique angles (non-  
right angles) with the  
projection plane.

Perspective Drawings: ...

Orthographic Drawings.

When drawing  
orthographic drawings,  
the observer present a 3D  
image in two dimensions.

When producing an  
orthographic drawing  
you will generally  
produce three views. A  
plan view, end elevation  
and a front elevation.

Difference between
