Bergson's thinking typifies a peculiarly Gallic tendency to rationalize the apparently ephemeral and subjective (in this case, humor), discussing it in exquisitely rarefied language in order to assert that which defies common sense (a funny hat is not funny, laughter expresses no emotion, no one laughs alone) but partakes nonetheless of a logical inevitability.

"Laughter" is a collection of three of Bergson's essays, originally published in 1900. Within them, Bergson attempts a study of laughter—particularly laughter caused by a comedian—to discover the different types of comic situations and to define the laws of the comic. A classic text for those with an interest in comedy and being a comic. This classic work is being republished now in a new edition complete with a Chapter From "Bergson And His Philosophy" by J. Alexander Gunn. Henri-Louis Bergson (1859–1941) was a French-Jewish philosopher. He had a significant influence on the tradition of continental philosophy during the first half of the twentieth century until World War II, and is famous for his idea that immediate experience and intuition are more important than abstract rationalism and science for understanding the nature of reality.

This is a fascinating work, with all the clearness characteristic of French criticism and the carefulness of a philosophic thinker, and it is excellently done into English. But few will be converted to M. Bergson's theory of the comic. Laughter is defined at the outset as a social corrective of the anti-social, and its cause has universal characteristics, however it occur. The laughable is always human: it is devoid of emotional elements and appeals to intelligence pure and simple; it appeals only to some social group and may be unintelligible to outsiders. It is the automatic and mechanical aspect of what should be living and free that makes us laugh. With this as a "leitmotiv," M. Bergson analyzes the comic in forms and movements, in situations and words, and in character. The chapter dealing with this last phase is the most deeply interesting, for it gives us the author's views on art and its relation to life, and hints at his ethics. Comedy belongs neither to art nor to life: its position is equivocal. Art deals with the individual and real, comedy with types. Comedy organizes laughter, and its material is ready-made when life is seized upon by vanity. In his conclusion he admits that we often sympathize with the comic character and are relieved from the strain of thinking. Again, "laughter is simply the result of a mechanism set up in us by nature or, what is almost the same thing, by our long acquaintance with social life. It goes off spontaneously... It has no time to look where it hits." We are told that laughter is often unjust, and should never be kind. If we push the matter farther, the result may be most unflattering: "Laughter is gaiety itself. But philosopher, who gathers a handful to taste, may find that the substance is scanty and the after-taste bitter." The book would repay a much more detailed analysis, and it is perfectly delightful to read. - Richard Smith, International Journal of Ethics, Vol. 23, No. 2, pp. 216-218.

With the help of theorists in such fields as psychology, anthropology, physiology, sociology, and folklore as well as literary criticism, Gutwirth perceives that writers across history have attempted to explain laughter in one of three ways - focusing on its social or political function, its emotional rationale, or its intellectual dimension. Offering an array of readings of comic texts and incidents, he constructs a general model of laughter which takes into account its causes, immediate effects, and long-range influence on human affairs. In conclusion, he looks at the unique nature of comic wisdom, particularly as reflected in works by Santayana, Cervantes, and Beckett.

These selected paragraphs distill the contents and give you a quick look inside Laughter - An Essay on the Meaning of the Comic: The objects around him, however, have all been tampered with by a mischievous wag, the result being that when he dips his pen into the inkstand he draws it out all covered with mud, when he fancies he is sitting down on a solid chair he finds himself sprawling on the floor, in a word his actions are all topsy-turvy or mere beating the air, while in every case the effect is invariably one of momentum. ...Let us try to picture to ourselves a certain inborn lack of elasticity of both senses and intelligence, which brings it to pass that we continue to see what is no longer visible, to hear what is no longer audible, to say what is no longer to the point: in short, to adapt ourselves to a past and therefore imaginary situation, when we ought to be shaping our conduct in accordance with the reality which is present. ...From the runner who falls to the simpleton who is hoaxed, from a state of being hoaxed to one of absentmindedness, from absentmindedness to wild enthusiasm, from wild enthusiasm to various distortions of character and will, we have followed the line of progress along which the comic becomes more and more deeply imbedded in the person, yet without ceasing, in its subtler manifestations, to recall to us some trace of what we noticed in its grosser forms, an effect of automatism and of inelasticity. ...In a word, if a circle be drawn round those actions and dispositions-implied in individual or social life-to which their natural consequences bring their own penalties, there remains outside this sphere of emotion and struggle-and within a neutral zone in which man simply exposes himself to man's curiosity-a certain rigidity of body, mind and character, that society would still like to get rid of in order to obtain from its members the greatest possible degree of elasticity and sociability. ...We will now endeavour to reconstruct the sequence of comic forms, taking up again the thread that leads from the horseplay of a clown up to the most refined effects of comedy, following this thread in its often unforeseen windings, halting at intervals to look around, and finally getting back, if possible, to the point at which the thread is dangling and where we shall perhaps find-since the comic oscillates between life and art-the general relation that art bears to life.

"[...] CHAPTER I THE COMIC IN GENERAL—THE COMIC ELEMENT IN FORMS AND MOVEMENTS—EXPANSIVE FORCE OF THE COMIC. What does laughter mean? What is the basal element in the laughable? What common ground can we find between the grimace of a merry-andrew, a play upon words, an equivocal situation in a burlesque and a scene of high comedy? What method of distillation will yield us invariably the same essence from which so many different products borrow either their obtrusive odour or their delicate perfume? The greatest of thinkers, from Aristotle downwards, have tackled this little problem, which has a knack of baffling every effort, of slipping away and escaping only to bob up again, a pert challenge flung at philosophic speculation. Our excuse for attacking the problem in our turn must lie in the fact that we shall not aim at imprisoning the comic spirit within a definition. We regard it, above all, as a living thing. What does laughter mean? What is the basal element in the laughable? What common ground can we find between the grimace of a merry-andrew, a play upon words, an equivocal situation in a burlesque and a scene of high comedy? What method of distillation will yield us invariably the same essence from which so many different products borrow either their obtrusive odour or their delicate perfume? The greatest of thinkers, from Aristotle downwards, have tackled this little problem, which has a knack of baffling every effort, of slipping away and escaping only to bob up again, a pert challenge flung at philosophic speculation. Our excuse for attacking the problem in our turn must lie in the fact that we shall not aim at imprisoning the comic spirit within a definition. We regard it, above all, as a living thing. However trivial it may be, we shall treat it with the respect due to life. We shall confine ourselves to watching it grow and expand. Passing by imperceptible gradations from one form to another, it will be seen to achieve the strangest metamorphoses. We shall disdain nothing we have seen. Maybe we may gain from this prolonged contact, for the matter of that, something more flexible than an abstract definition, -a practical, intimate acquaintance, such as springs from a long companionship. And maybe we may also find that, unintentionally, we have made an acquaintance that is useful. For the comic spirit has a logic of its own, even in its wildest eccentricities. It has a method in its madness. It dreams, I admit, but it conjures up, in its dreams, visions that are at once accepted and understood by the whole of a social group. Can it then fail to throw light for us on the way that human imagination works, and more particularly social, collective, and popular imagination? Begotten of real life and akin to art, should it not also have something of its own to tell us about art and life
