EBOOK: Principles and Practice of Marketing, 9e

The ninth edition of McGraw-Hill's leading textbook, Principles and Practice of Marketing, provides a contemporary and modern introduction to marketing. Covering the importance of customer value alongside the 4Ps, this authoritative text provides students with a core understanding of the wider context of marketing operations within companies, illustrated with innovative examples of marketing in practice. It has been updated with the latest developments, such as trends towards social and ethical marketing and cutting-edge technological change.

Now revised and updated, this text offers undergraduate students an introduction to the world of marketing. The fourth edition includes new material on areas such as e-commerce, the Internet and relationship marketing. Building on the enormous success of previous editions, this best-selling text has been updated and revised, and continues to provide an up-to-date and student-friendly introduction to marketing. Marketing principles are explained in the context of organisations, business management practice and the changing business environment. Examples and short case studies are used to bring the subject to life, emphasising the practical aspects of the subject as well as the concepts.

Small and medium-sized enterprises (SMEs) dominate the market in terms of sheer number of organizations. Their role in the business world is difficult to overstate. Despite this, there is a high failure rate among smaller organizations, which can be explained to a significant degree by a lack of marketing understanding in this sector. Introducing the importance of marketing to entrepreneurial firms this book guides the student through the fundamentals of marketing within the SME context, providing a more value-added learning experience than your standard marketing run-through. The authors deal directly with "people issues" (i.e. everyday entrepreneurial marketing interactions) to prepare students for the "dragon's den" of entrepreneurialism. This new and lively textbook provides a fresh and unfettered approach for marketing students who require a more real-world understanding of the impact of their discipline on entrepreneurial firms. The growing student body involved with studying entrepreneurship will also benefit from the customer insight offered by this approach.

This fully updated edition combines the latest research with real-life examples of social marketing campaigns the world over to help you learn how to apply the principles and methods of marketing to a broad range of social issues. The international case studies and applications show how social marketing campaigns are being used across the world to influence changes in behaviour, and reveal how those campaigns may differ according to their cultural context and subject matter. Every chapter is fully illustrated with real-life examples, including campaigns that deal with racism, the environment and mental health. The book also shows how social marketing influences governments, corporations and NGOs, as well as individual behaviour. The author team combine research and teaching knowledge with hands-on experience of developing and implementing public health, social welfare and injury prevention campaigns to give you the theory and practice of social marketing.

Up-to-date case studies and examples developed throughout chapters help students to fully appreciate those issues that are specific to services marketing: methods of defining the service offer; conceptualization, measurement and management of service quality; managing the employee input to the service offer and developing relationships with customers; and strategies to make services accessible.
