Refrigeration compressors and air conditioning compressors provide air conditioning, heat pumping, and refrigeration for large-scale facilities and equipment. They use compression to raise the temperature of a low-pressure gas, and also remove vapor from the evaporator. Most refrigeration compressors (refrigerant compressors) are large, mechanical units that form the heart of industrial ...

The field of refrigeration and air-conditioner has undergone tremendous changes in the last century. More and more new refrigerants having improved properties are being produced globally. Research in this field is now directed towards producing better environment friendly refrigerants and in replacing old refrigeration systems using halogenated refrigerants with the newer ones.
