Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world....

Our world is currently divided into territorial states that resist all attempts to change their borders. But what entitles a state, or the people it represents, to assume monopoly control over a particular piece of the Earth's surface? Why are they allowed to prevent others from entering? What if two or more states, or two or more groups of people, claim the same piece of land? Political philosophy, which has had a great deal to say about the relationship between state and citizen, has largely ignored these questions about territory. This book provides answers. It justifies the idea of territory itself in terms of the moral value of political self-determination; it also justifies, within limits, those elements that we normally associate with territorial rights: rights of jurisdiction, rights over resources, right to control borders and so on. The book offers normative guidance over a number of important issues facing us today, all of which involve territory and territorial rights, but which are currently dealt with by ad hoc reasoning: disputes over resources; disputes over boundaries, oceans, unoccupied islands, and the frozen Arctic; disputes rooted in historical injustices with regard to land; secessionist conflicts; and irredentist conflicts. In a world in which there is continued pressure on borders and control over resources, from prospective migrants and from the desperate poor, and no coherent theory of territory to think through these problems, this book offers an original, systematic, and sophisticated theory of why territory matters, who has rights over territory, and the scope and limits of these rights.

Since their inception, the Perspectives in Logic and Lecture Notes in Logic series have published seminal works by leading logicians. Many of the original books in the series have been unavailable for years, but they are now in print once again. In this volume, the fifth publication in the Lecture Notes in Logic series, the authors give an insightful introduction to the fascinating subject of the model theory of fields, concentrating on its connections to stability theory. In the first two chapters David Marker gives an overview of the model theory of algebraically closed, real closed and differential fields. In the third chapter Anand Pillay gives a proof that there are 2ⁿ non-isomorphic countable differential closed fields. Finally, Margit Messmer gives a survey of the model theory of separably closed fields of characteristic p > 0.
