If A is a vector, then sum(A) returns the sum of the elements.. If A is a matrix, then sum(A) returns a row vector containing the sum of each column.. If A is a multidimensional array, then sum(A) operates along the first array dimension whose size does not equal 1, treating the elements as vectors. This dimension becomes 1 while the sizes of all other dimensions remain the same.

Complete First for Schools is official preparation for the revised 2015 Cambridge English: First (FCE) for Schools exam. This Student's Book combines the very best in contemporary classroom practice with engaging topics aimed at younger students. The information, practice and advice contained in the course ensure that they are fully prepared for all parts of the test, with strategies and skills to maximise their score. The CD-ROM contains grammar and vocabulary exercises for motivating, flexible study. The Workbook provides extra practice of the language covered in the Student's Book. The Audio CD provides the listening material for the exercises in the Workbook. Class Audio CDs, available separately, contain the recordings for the Student's Book listening exercises.

This volume collects the papers presented at the 11th International Conference onDatabaseTheory,ICDT2007,heldduringJanuary10-12,2007,inBarcelona, Spain. ICDT (http://alpha. luc. ac. be/?lucp1080/icdt/) now has a long tradition of international conferences, providing a biennial scienti'c forum for the com- munication of high-quality and innovative research results on theoretical aspects of all forms of data management systems and database technology. The conf- ence usually takes place in Europe, and previous conferences were held in Rome (1986),Bruges(1988),Paris(1990),Berlin(1992),Prague(1995),Delphi(1997), Jerusalem(1999),London(2001),Siena(2003)andEdinburgh(2005). ICDT has merged with the Symposium on Mathematical Fundamentals of Database S- tems (MFDBS), initiated in Dresden in 1987, and continued in Visegrad in 1989 and Rostock in 1991. This yearICDT received111papersubmissions (after 138titlesandabstracts were ?rst announced). Two of the papers were later withdrawn and one was rejected as it was 24 pages long (instead of 15). From the remaining 108 s- missions, the ICDT Program Committee selected 25 papers for presentation at the conference. Most of these papers were "extended abstracts" and preliminary reports on work in progress. It is anticipated that most of these papers will - pear in a more polished form in scienti'c journals. The proceedings also contain three invited papers by Jan Chomicki, Cynthia Dwork, and Laura Haas. The Best Newcomer Award, for the best submission written solely by authors who had never published in earlier ICDT proceedings, was given by the Program Committee to Piotr Wiecezorek for his paper "Complexity of TypecheckingXML Views of Relational Databases.

This edition is fully updated to give students the support they need to master more than 7,000 words and phrases in American English. Following the popular in Use format, new language is taught in manageable two-page units with presentation of vocabulary on the left-hand page and innovative practice activities on the right. Suitable for self-study or classroom use, the books are informed by the Cambridge International Corpus to ensure vocabulary taught is useful, up-to-date, and presented in a natural context.
