If a taboo book manages to fly beneath the radar, it's probably because the book is still going unnoticed and not getting sales or reviews. The obvious reason for lack of attention is a lack of paid book promotion. But self-publishers are rarely in the position to fork out hundreds, or even thousands of dollars to get their book seen.

A taboo is an implicit prohibition on something (usually against an utterance or behavior) based on a cultural sense that it is excessively repulsive or, perhaps, too sacred for ordinary people. Such prohibitions are present in virtually all societies. On a comparative basis, taboos, for example related to food items, seem to make no sense at all, as what may be declared unfit for one group by ...

A witty attack on the illusion that the self is a separate ego that confronts a universe of alien physical objects.

You Can't Say That! Do you have a right to be offended by the facts? Against all the evidence, the mainstream media insist that America has never been more racist and sexist. The police are waging a war on Black people. "White privilege" means minorities never get a fair shake. Although this narrative of oppression is demonstrably fictitious, it is taboo to question it, and those who do so risk being labeled racist or sexist themselves. America needs an honest conversation based on common sense and cold, hard facts. Honesty and respect for the facts are the specialty of Wilfred Reilly, the celebrated author of Hate Crime Hoax. In Taboo, he fearlessly examines ten forbidden truths that have been buried by political correctness. They include: -The Black rate of violent crime is roughly 2.5 times the white rate. When demographic variables are taken into account, there are no racial differences in the rate of police-involved shootings. -Interracial crime is remarkably rare, but 75 to 80 percent of it occurs against white people. -Minorities can be racist—take the Nation of Islam, which holds that white people are an inferior race created by a Black scientist. -Disparities between racial groups in IQ testing and SAT performance are the result of cultural variables, such as the presence of a father in the home, not racism. Reilly goes where most social scientists fear to tread, using objective statistics and common sense to tackle taboo topics. Taboo is an essential takedown of the lies you hear every day from ideological activists and lazy, biased media.

A revelatory primer on what it means to be human, from "the perfect guide for a course correction in life" (Deepak Chopra)—and a mind-opening manual of initiation into the central mystery of existence. At the root of human conflict is our fundamental misunderstanding of who we are. The illusion that we are isolated beings, unconnected to the rest of the universe, has led us to view the "outside" world with hostility, and has fueled our misuse of technology and our violent and hostile subjugation of the natural world. To help us understand that the self is in fact the root and ground of the universe, Watts has crafted a revelatory primer on what it means to be human—and a mind-opening manual of initiation into the central mystery of existence. In The Book, Alan Watts provides us with a much-needed answer to the problem of personal identity, distilling and adapting the Hindu philosophy of Vedanta.

Taboo, Grammy Award-winning founding member of the Black Eyed Peas, shares the inspiring story of his rise from the mean streets of East L.A. to the heights of international fame.--From publisher description.

In virtually every sport in which they are given opportunity to compete, people of African descent dominate. East Africans own every distance running record. Professional sports in the Americas are dominated by men and women of West African descent. Why have blacks come to dominate sports? Are they somehow physically better? And why are we so uncomfortable when we discuss this? Drawing on the latest scientific research, journalist Jon Entine makes an irrefutable case for black athletic superiority. We learn how scientists have used numerous, bogus "scientific" methods to prove that blacks were either more or less superior physically, and how racist scientists have often equated physical prowess with intellectual deficiency. Entine recalls the long, hard road to integration, both on the field and in society. And he shows why it isn't just being black that matters—it makes a huge difference as to where in Africa your ancestors are from.Equal parts sports, science and examination of why this topic is so sensitive, Taboo is a book that will spark national debate.

trafficking and unfreedom. Flying high in the Himalayan ranges, weaving a trail through Coimbatore, Ooty, Chandigarh, Khandala and the shipping town of Alang, diving down to the southern-most tip of India and onwards to Sri Lanka, Erendira, through many languages and cultures unearths the forbidden identity of a sex worker on a footpath. Finally, you emerge questioning the intent of our society and political organizations to stop this and the utter disregard for such questions in our democracy.
