All rights reserved. UI design is ultimately about communicating to users, both in terms of what you say and how you say it. If you can explain how to perform a task to the target user in person in a way that's clear and concise, you can apply those same communication techniques in a UI. We should have the same standards for software interaction as we do for social interaction. If a UI feels like a natural, professional, friendly conversation, it's probably a good design.

The author's premise is that "user interface design isn't a subjective visual art about pixels and aesthetics but rather a principled objective communication skill to explain tasks to users". So while he does touch on mental models, interaction patterns, and visual design, it always ties back to communication.
