anabolic steroid products from various underground labs (UGLs) for toxic heavy metals and quantification of steroid dosing. Twenty-one percent of the steroid products were contaminated with lead, tin, mercury, and/or arsenic; 64% were significantly underdosed or overdosed.

Identities of Underground Labs with Contaminated and ...  
Going Underground? by William Llewellyn, with Ronny Tober (Sept. 23, 2008) There is no question about it. Underground steroid products make up the dominant share of the global steroid business now. What was once a market largely fed by real prescription drugs, is now one where small-scale underground manufacturing and home brewing operations thrive.
