At least one dated to 30,000 B.C. Counting is but the earliest form of mathematics. It was first a simple device for accounting for quantity. However, this is so basic, even primitive, that it cannot be considered as a subject or science. We are looking for sources of mathematical thought in human activity.

Where did Mathematics Start?

The origins of math has become a hot topic of debate as neuroscientists continue to uncover mathematical abilities we seem to be born with, and have pinpointed regions in the brain responsible for mathematical thinking. Other scientists are finding that certain math capabilities vary by culture and depend on how we interact with the world.
