involved in the
'harvesting' of
trees,
processing of
boards and the
manufacture of
wood based
products.

*SUMMARY - DESIGN
AND TECHNOLOGY*

For example,
balsa wood which
is noted for its

Download Free Wood

Lightness and softness, is actually classified as a hardwood. PDF

EXERCISE :

EXAMPLE OF A

SOFTWOOD : PINE

- Is a

relatively cheap wood used in the

Download Free Wood

building trade
and for
furniture. It is
pale in colour,
quite easy to
cut and shape,
and machines
relatively well.

*Natural Woods -
DESIGN AND
TECHNOLOGY*

One side is
natural wood and

Download Free Wood

the other is a layer of glue/adhesive.

To use: A strip of veneer is cut slightly longer than the edge of the board. It is positioned on the edge of the manmade board, natural wood side facing upwards. A 'hot'

Download Free Wood

iron is placed
on top of the
veneer. This
warms and melts
the glue.

Machine routers
are extremely
versatile
machines. They
are generally
used to cut
grooves in

Download Free Wood

natural wood and
manmade boards.

They have a
cutter that
rotates at high
speed - as the
operator pushes
the router
forwards the
cutter removes
the wood in its
path.

Machine Routers

DESIGN AND TECHNOLOGY

Laminated wood is suitable for the head rest, back rest and seat of the Eames chair.

When thin layers of veneer are glued together, forming one part, they are called

Download Free Wood

Laminates.
Complex shapes
can be achieved
with one piece
of laminated
material. The
natural wood
gives a quality
finish.

TECHNOLOGY

Identify the problem - The first step is to ask or figure out what the problem is that we need to solve.; Explore Ideas - The second step is to Imagine, in this step a designer would

Download Free Wood

brainstorm lots of ideas, do some research about what he or she thinks they might want to create. They need to select a few of their best ideas and eventually narrow it down to their absolute best.
